#### TAXONOMIC INDEX: GEOPLANIDAE

This "Taxonomic Index" includes the entire family Geoplanidae STIMPSON, 1857, and combines specific names listed in both Part I (Geoplaninae published in 1990) and Part II (Caenoplaninae and Pelmatoplaninae published in 1991) into one alphabetical listing. Subfamilies, genera and subgenera are also included.

Part I of the Geoplanidae Index has several scientific errors in regard to some South American geoplanid species. Although they will be corrected in one of our 1992 article of this indices series (cf. OGREN, KAWAKATSU & FROELICH, 1992; pp. 59-103 in the present issue), the present "Taxonomic Index" does not include these corrections and additions. All necessary corrections and additions for the geoplanid species of the world will be contained in the "Combined Taxonomic Index" by OGREN, KAWAKATSU & FROELICH (Bull. Fuji Women's College, No. 31, Ser. II. 1993).
